## **Declaration of Commitment to the promotion of Gender Equality at the Cyprus Institute of Neurology and Genetics (CING)**

The Cyprus Institute of Neurology and Genetics is committed to promoting equal treatment and equal opportunities between men and women at all levels and activities.

As an employer, CING is also committed to equal treatment and respect for the diversity of its workforce.

Our goal is to ensure that these commitments are integrated into our daily transactions with our patients, colleagues, students and collaborators.

Gender discrimination will not be tolerated, and we will strengthen our commitment through:

- promoting equal opportunities and diversity.
- promoting an environment free from discrimination, intimidation and harassment, as well as addressing behaviours leading to such phenomena.
- recognition and appreciation of each individual contribution, providing support and encouragement to staff to develop their careers and increase their contribution through the strengthening of their skills and competences.

Prof. Leonidas Phylactou

Chief Executive Officer & Medical Director
